alogis-Printmanager

The add-on to alogis-PM-Cockpit

alogis-Printmanager – visualise, save and print all PM objects

alogis-Printmanager enhances the **alogis-PM-Cockpit** with important functions used to select and issue allocated documents.

For the whole hierarchy, all types of documents assigned to PM objects can be marked and combined into one PDF document. This can then be saved, printed or even sent as an email attachment.

Thus, it is possible to select all the maintenance documents relevant for the respective issue in one operation and deliver to the recipient as needed.

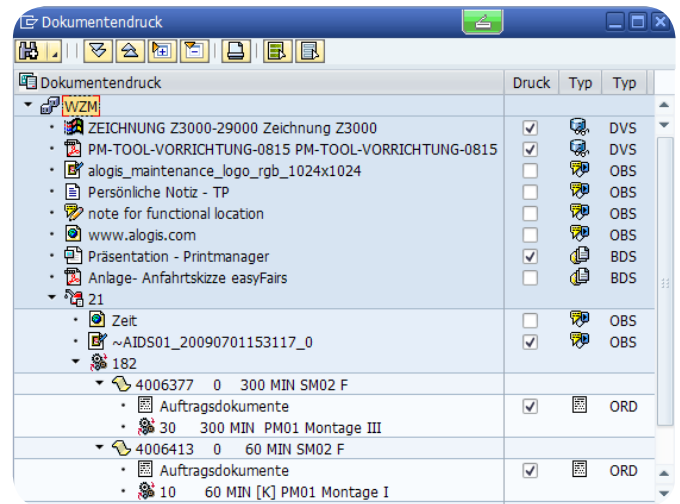

The documents can also be displayed within the hierarchical view by double clicking in the type-specific application.

Features

- Visualisation of all documents using a hierarchical structure of PM objects
- Display as icon with title or with documents you want to output
- Combine selected objects and create* documents in PDF format (*PDF tools required)
- Save, print and/or send documents as email attachment
- Visualisation by icons for a quick overview

Benefits

- Central input for all activities as part of document assignment and output along PM structures
- Quick summary of desired documents (order printing, drawings, notes, etc.) as a PDF document
- Direct processing by printing, sending, saving, etc.; quicker and more targeted access to printed documents

Print documents in the **alogis-Printmanager**

System requirements

- SAP® ECC DIMP 5.0 or higher
- SAP® R/3® 4.7 with DI 4.7.1

You can find detailed information about this and other topics on our product pages on the Internet.
